

BqExAvI Survey Analysis (2017-2022)

Modesto

2023-03-01

Moodle survey

We are importing the data from the students answers in 5 years, between 2018-2022. The quiz consists on up to 77 questions, being 5 free-text questions (50, 51, 52, 75, 76 & 77), 7 three-options questions and the rest in Likert scale. The latter will be categorized as “Positive” or “Negative” if 5 (“Totally agree”) means a “good” or “bad” feedback.

```
#load questions
questions <- read.csv("questions.csv", head=TRUE, sep=";")
questions <- cbind(row.names(questions),questions[,c(3,1,2)])
#add type variable
questions$type <- "Pos."
questions$type[questions$Section=="Open"] <- ""
questions[c(4,10,56,63,63,64,65,66,67,72),5] <- "Neg."
questions$type[questions$Section=="Open"] <- "NA"
colnames(questions) <- c("No.", "Since", "Section", "Question", "Type")

kbl(questions, align = "cccl", caption = "Table 1. Students opinion quizz. The bulk of the questionnaire",
    kable_styling(bootstrap_options = "striped", full_width = F) %>%
    column_spec(1, italic = T)
```

Load data and pairwise t.test

Survey answers were downloaded from Moodle as txt/csv files. Moodle updates generated some format differences that could be bypassed after opening the files with Numbers and exporting as tables with “;” as column separator. We now show pairwise t.tests carried out to identify significant differences per year in the answers.

```
#read the data in a list of dataframes
#didn't use the headers to avoid mistakes
quiz <- lapply(2017:2022, function(x) read.csv(paste0("survey",x,".csv"),header=FALSE,skip=1,sep=";"))
#add Year as the third variable (empty so far)
curso <- c("2017", "2018", "2019", "2020", "2021", "2022")
for (i in 1:length(quiz)){
  quiz[[i]][,3] <- curso[i]
}

#adjust questions changes
#remove questions in column 32 & 40 from 2017, because we removed it in the following years
quiz[[1]] <- quiz[[1]][,-c(32,40)]
quiz[[6]] <- quiz[[6]][,-10]
names(quiz[[6]]) <- names(quiz[[5]])
```

Table 1: Table 1. Students opinion quizz. The bulk of the questionnaire was designed for the year 2017 and new questions were added as indicated in the rightmost column.

No.	Since	Section	Question
1	2017-2018	Equipment	We had sufficient amount of small lab equipment (e.g. pippettes, cuvettes,...)
2	2017-2018	Equipment	Access to general instruments/equipment (e.g. PCR, laminar flow hoods) was
3	2017-2018	Equipment	Lab equipment was well maintained/modern
4	2017-2018	Length and schedule	The course is too long
5	2017-2018	Length and schedule	The period allocated for the course within the term is appropriate
6	2017-2018	Length and schedule	On average, the number of hours per day is sufficient
7	2017-2018	General Methodology	Student engagement
8	2017-2018	General Methodology	Course interest
9	2017-2018	General Methodology	Course usefulness
10	2017-2018	General Methodology	Demand on student's part
11	2017-2018	General Methodology	Course difficulty
12	2017-2018	Method objectives	State a hypothesis
13	2017-2018	Method objectives	Design an experimental strategy to answer specific biological questions
14	2017-2018	Method objectives	Identify cost-effective (time and money-wise) practical techniques to answer a g
15	2017-2018	Method objectives	Write an experimental protocol including all relevant controls
16	2017-2018	Method objectives	Execute an experimental protocol
17	2017-2018	Method objectives	Record, analyze and interpret experimental results
18	2017-2018	Method objectives	Integrate information from other researchers and discuss your results within a l
19	2017-2018	Method objectives	Follow lab safety rules
20	2017-2018	Method objectives	Ability to work in a team
21	2017-2018	Activities interest	Introductory lecture (day 1)
22	2017-2018	Activities interest	Stats Intro (day 2)
23	2017-2018	Activities interest	Initial brainstorming session (day 2)
24	2017-2018	Activities interest	Group meetings (experiment planning and design)
25	2017-2018	Activities interest	Team feed-back session (propossal design)
26	2017-2018	Activities interest	Final group discussion session (day before the last)
27	2017-2018	Activities interest	Final class discussion session (last day)
28	2017-2018	Activities Length	Introductory lecture (day 1)
29	2017-2018	Activities Length	Stats Intro (day 2)
30	2017-2018	Activities Length	Initial brainstorming session (day 2)
31	2017-2018	Activities Length	Group meetings (experiment planning and design)
32	2017-2018	Activities Length	Team feed-back sessions
33	2017-2018	Activities Length	Final group discussion session (day before the last)
34	2017-2018	Activities Length	Final class discussion session (last day)
35	2017-2018	Assesment	Safety and clean-up weekly evaluation
36	2017-2018	Assesment	Individual lab notebook evaluation (design)
37	2017-2018	Assesment	Group lab notebook evaluation (design)
38	2017-2018	Assesment	Group lab notebook evaluation (results)
39	2017-2018	Assesment	Peer-evaluation (Team)
40	2017-2018	Assesment	Final exam
41	2017-2018	Learning Objectives	State a hypothesis
42	2017-2018	Learning Objectives	Design an experimental strategy to answer specific biological questions
43	2017-2018	Learning Objectives	Identify cost-effective (time and money-wise) practical techniques to answer a g
44	2017-2018	Learning Objectives	Write an experimental protocol including all relevant controls
45	2017-2018	Learning Objectives	Execute an experimental protocol
46	2017-2018	Learning Objectives	Record, analyze and interpret experimental results
47	2017-2018	Learning Objectives	Integrate information from other researchers and discuss your results within a l
48	2017-2018	Learning Objectives	Follow lab safety rules
49	2017-2018	Learning Objectives	Ability to work in a team
50	2017-2018	Open	Best
51	2017-2018	Open	Wors 2
52	2019-2020	Open	Open comments
53	2019-2020	ELN	I knew OneNote before the course.
54	2019-2020	ELN	I find OneNote a useful app for the elaboration of the course Notebook.
